WINTER OILSEED RAPE

TECHNICAL AND MARKETING GUIDE

Hybrid with very high seed yield and gross output potential

Excellent light leaf spot resistance

Very good lodging resistance and standing

High oil content

SUMMARY

Emerson is a hybrid winter oilseed rape variety with a very high gross output, good standing and the best available resistance to light leaf spot. Its high oil content and seed yield offers the potential of high economic performance for growers.

BREEDER and AGENT

Breeder: LS Plant Breeding; UK Agent: Nickerson

YIELD AND GROSS OUTPUT POTENTIAL

Emerson has a very high seed yield and gross output potential offering high returns to growers.

STRAW CHARACTERS

	EMERSON	Toccata	Disco
Resistance to Lodging	8	8	8
Stem Stiffness	7	6	6
Height (cm)	164	170	167
Earliness of Flowering	7	7	7
Earliness of Maturity	6	6	6

Emerson has a good all-round package of agronomic features, with very good resistance to lodging and stiff stems, making it an easy variety to grow and harvest.

DISEASE RESISTANCE

	EMERSON	Toccata	Disco
Resistance to Light Leaf Spot	9	6	-
Resistance to Stem Canker	5	4	-

Emerson has outstanding resistance to light leaf spot making it well suited to situations where this disease is present, particularly the more northern region of the UK

OIL CONTENT

	EMERSON	Toccata	Disco
Oil Content (%)	44.9	44.4	44.2

Emerson has a higher than average oil content, providing the grower with an increased chance of achieving valuable oil premiums.

Data from the HGCA Recommended Lists database, full data at www.hgca.com.
On the 1-9 scales, high figures indicate that a variety shows the character to a high degree.

Rothwell, Market Rasen, Lincolnshire, LN7 6DT. England.
